

# Quasi-TEC Instructions

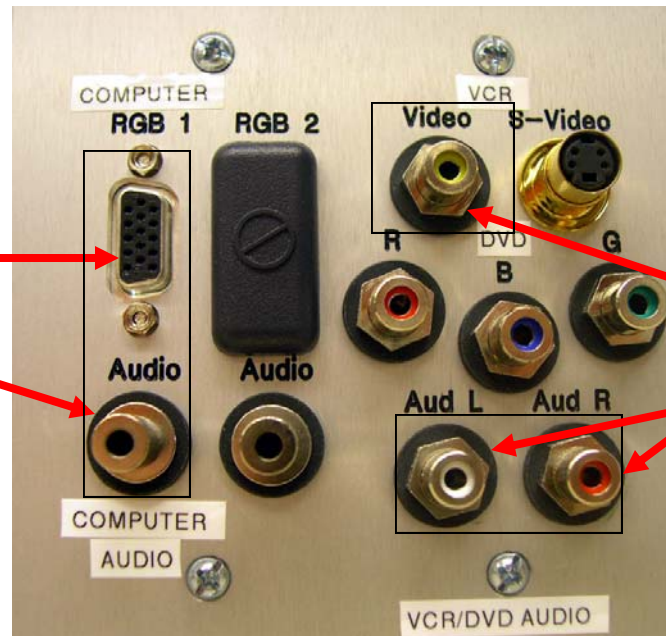

## Connecting a Computer

1. Turn **ON** projector using the **remote**.
2. Turn **ON** the power on the amplifier.
3. Plug in the video cable here.
4. Plug in the audio cable (if needed) here.
5. Select “input 1” on the projector **remote**.

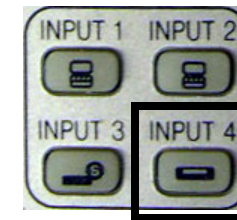

6. Plug in a network cable into the jack marked ‘active’ if a network connection is needed.
7. Enable the LCD/CRT on your laptop by holding the “Fn” key and pressing the correct function key on your laptop keyboard.

## Connecting a DVD/VCR

1. Turn **ON** projector using the **remote**.
2. Turn **ON** the power on the amplifier.
3. Plug the yellow video plug into the wall-plate port labeled “video” here.
4. Plug the white and red audio-cables in the plugs at the bottom of the plate. Match the colors accordingly.
5. Select “input 4” on the projector **remote**.

## Shut Down Procedures

1. Turn **off** the projector by pushing the “Stand By” button on the **remote** twice.
2. Turn **off** the power on the amplifier.
3. Unplug your devices from the plate.
